

# SECURITY

## The Threat is Real, What are You Doing About It?

Security Solutions from  
Plant to Enterprise

As a System Integrator for Rockwell Automation, we have partnered with them to provide our clients access to their cyber security expertise and services.

Rockwell offers industrial security and solutions with a comprehensive approach beyond just network security. They protect the integrity and availability of your complex automation solutions. Our industrial security services will help you effectively assess, implement, and maintain ICS security within operations.

Rockwell enables transformational technologies that rely on enterprise connectivity. The security landscape is ever-changing so you need a partner who will help you manage the constantly evolving risk. To do that effectively, you need a partner who you can trust and who is transparent in their approach.

### Trust TTS Energy Services and Rockwell Automation

We are committed to ensuring the Connected Enterprise ecosystem is safe, secure and resilient from the ever-changing global cybersecurity threat landscape. This is addressed through a holistic security framework focused on securing our products, our services and solutions, and lastly our own infrastructure. This is driven by key programs, leveraging an inter-disciplinary approach focused on areas such as:

- Insider Risk Program
- Secure Development Environment
- Product Security Office
- Third Party Risk Management
- Supply Chain Security
- And Security Awareness

Rockwell Automation is primarily aligned to the following established industrial security standards

- International Electrotechnical Commission (IEC) 62443
- National Institute of Standards and Technology 800-82
- National Institute of Standards and Technology 800-171
- NERC-CIP
- United States Department of Homeland Security / National Cybersecurity and Communications Integration Center (NCCIC)
- United States Department of Homeland Security / Idaho National Lab DHS-INL/EXT-06-11478

All of these organizations promote a common message encouraging ICS (Industrial Control Systems) stakeholders to establish ICS segmentation, establish an Industrial Demilitarized Zone (IDMZ) and to practice "Defense in Depth".
