

Portable Power From TTS

The need for mobile, temporary, or distributed power is growing at a rapid pace throughout the world. The ever changing political, economic and climate structure of today's world now dictate how electric power will be delivered. Since there are so many different circumstances that come into play, TTS can provide a multiple array of generation and electrical distribution offerings that can fit just about any situation. Our equipment can be suited for any electrical load, available fuel, frequency, voltage, distribution, emissions requirements and mobility.

TTS mobile power business typically falls into one of the following categories:

- Light Industrial and Aero-derivative Mobile Gas Turbines
- Reciprocating Engines
- Barge Mounted Power
- Mobile and Portable Micro-Grid Systems

The following questions will help us prepare a proposal for your portable power needs.

Please be prepared to specify:

1. Rent, lease or buy?
2. How long do you expect to need the power?
3. Where do you need the units to be delivered?
4. The fuel type to be used (heavy oil, diesel or natural gas, flare gas, etc.)?
5. The application?
6. The frequency required?
7. How soon the units are required?
8. Expected payment plan/scenario?
9. Skid or trailer mounted?
10. Are there any emission compliance requirements?
