

Comprehensive Control System Solutions

Our company specializes in industrial control solutions in a variety of sectors from retrofitting to designing a balance of plant control systems. As a Rockwell Recognized System Integrator, TTS has extensive experience with Rockwell based control systems along with other platforms such as GE and Emerson.

Recognized System Integrator

A ROCKWELL AUTOMATION PARTNER

At TTS, our primary focus is to work with customers to provide operational excellence while lowering operational risk. This includes:

- Faster Commissioning Through Dedicated Control Solutions
- Reduced Training Costs and Improved Operator Productivity
- Reduced Programming, System Checkout, and Start-Up Hours
- Better Root Cause Analysis, Diagnostics, and Overall Operational Analytics
- Reduced Project Risks and Integration Cost
- Shorter Maintenance Outages Virtual and Remote Support Options

Typical Control System Assessments

The list below includes key topics that we work on in a typical control system:

- Complete Plant PLC
- Complete System Design and Build
- Control Rooms/Buildings
- De-Mineralized Water Treatment
- Motor Drive Cabinets and Motor Controls
- Plant Cooling Water Systems
- Plant Instrument Air
- Switchgear Interface
- VFD Controls
- HMI Development

We look forward to working with you and discussing how our control system solutions can benefit you.
